HOW WE OPERATE

Our Company was founded on the belief that owning and operating our manufacturing facilities and controlling every step of the production cycle was the best way to make great apparel. Starting from spinning cotton and other fibres into yarn through to assembling the final garments and distributing our products, we prefer to do it all with our vertically integrated business model.

Our manufacturing operations are headquartered in Honduras, where we have our largest production base. Our yarn-spinning operations are all located in the United States, while textile, sewing, and sock manufacturing operations take place across our Central American, Caribbean and Bangladesh hubs.

For more information on our facilities see our 2020 Annual Report or visit the Our Factories page on our website.

TRACK RECORD IN ESG

Our ESG framework, Genuine Responsibility®, is aligned with our long-term growth strategy and with how we are Making Apparel Better®. It reflects our commitment to operating responsibly and integrating sustainability into our business practices, focusing on three core pillars and their respective commitments.

We manufacture the majority of the products that we sell and have always looked to minimize waste, optimize resources, and pursue continuous improvements in every aspect of our operations – as well as those in our extended supply chain – so that we can run our business with the least impact possible on the environment.

The investments we are making not only help reduce our impacts on the planet, but they also reduce our operating costs and make us more flexible, resilient, and productive. While we know we have further to go in our journey, we are committed to continue testing innovative approaches and working with others to reduce our impact.

"Trust what you wear,

product

The common aim of all the SOLO Group brands is to create clothing and accessories enabling everyone to express their USP. SOLO Group's commitment is to offer high quality clothing that meets everyone's values and expectations. Social responsibility is in our blood, and this commitment has dictated everything we have done over the past 30 years.

people

To achieve this, we believe that every single person who has contributed to manufacturing our products should be respected, valued and encouraged. This is why we are involved with several different organisations that guarantee working and employee conditions are adhered to. Independent audits guarantee the quality of our certifications.
As we believe that our action should not be limited to the people involved in manufacturing our products, we have been committed from the outset to supporting various charities aiming to improving overall health, women's living conditions and children's education.

planet

Conscious of the impact of our business on resources, we work to minimise its consequences and compensate accordingly. At each stage of the production chain, we seek and implement solutions to eliminate practices deemed excessively costly in terms of the environment, or find alternatives. We adhere to organisations or associations whose common aim is to constantly improve processes so that we leave future generations with a sound legacy.
